- The UN Millenium goal - to provide basic primary education around the world by 2015
- Currently 57 million do not have access to basic primary education
- Major issues supporting education especially for marginalized children - in times of conflict, natural and man-made disasters
- UNICEF works with the government to promote social adhesion, easing of ethnic tension yes, but if we have an ethnic system that will not budge then it creates a lot of disparity which limits access to education
- At home based learning system, distribute books and school materials to the home
- Education is key to empowerment against perpetuation of a poor system!
- Culture and values should be respected when restructuring a system
